

Child Development Dayhomes' Illness Policy: Dayhome Educators

Educators cannot operate the dayhome if they or anyone in their household has symptoms. **For educator's children or children who live in the dayhome have symptoms, please see the CDDH illness policy for children.**

If an educator or member of their household 18 years and older have any of the following **symptoms**, the dayhome is closed for 2 days. The dayhome can re-open when the individual no longer has symptoms.

- ❖ New onset of cough or worsening chronic cough
- ❖ Fever
- ❖ New or worsening shortness of breath or difficulty breathing
- ❖ Runny nose
- ❖ Sore throat
- ❖ Loss of sense of smell or taste

If an educator or member of their household 18 years and older have any of the following **other symptoms**, the dayhome cannot operate. If the symptom is improving after 24 hours, they may re-open the dayhome if well enough to do so and it has been at least 24 hours since the symptom started.

- ❖ Stuffy nose
- ❖ Painful swallowing
- ❖ Chills
- ❖ Headache
- ❖ Muscle or joint ache
- ❖ Feeling unwell, fatigue or severe exhaustion
- ❖ Nausea, vomiting, diarrhea, or unexplained loss of appetite
- ❖ Conjunctivitis (pink eye) – dayhome can re-open 24 hours after treatment has started

Please contact your consultant for guidance regarding a positive covid case in the dayhome
